

To Students

Trustee(Education and Student Affairs),
Vice President

【Third Report】<IMPORTANT>Notice on New Coronavirus Infectious Disease

In addition to the first report delivered on February 27 and the second report delivered on March 3 through Acanthus Portal, we strongly request you to refrain from the following things until April 20, when classes start, in order to prevent the spread of the new coronavirus infectious disease.

1. Nonessential and non-urgent outing (Especially for students returning from foreign countries or areas other than Ishikawa Prefecture)

Please refrain from nonessential and non-urgent outing continuously.

Particularly, we strongly recommend you not to travel to the areas where the infection spread is remarkable, in light of the rapid increase in the number of infected people in countries such as Italy and the United States, etc., and areas such as Tokyo and Osaka.

Also, we recommend students who are currently outside Ishikawa Prefecture, including overseas, to return to Ishikawa Prefecture with sufficient time before class starts (like two weeks ago), and prepare for the classes, refraining from going out as much as possible.

2. Participation in events with high infection risk, such as parties, karaoke, and music live

We continuously urge you to refrain from participating in those events to prevent small patient populations (clusters) from creating the next ones.

Especially in club activities, we forbid face-to-face recruitment of new students until the classes start.

3. Other

- ① If you have a fever of 37.5 degrees or higher, cough, sneezing, nasal discharge, sore throat, etc., please rest at home. If you took a PCR test for suspected infection, please promptly report it to the Student Affairs Division of your department.
- ② In the future, notices will be distributed at any time according to the social situation, so be sure to check all notifications (website, portal notifications, etc.) from Kanazawa University.
